

New Walkway on 21st Ave S

WHAT'S HAPPENING

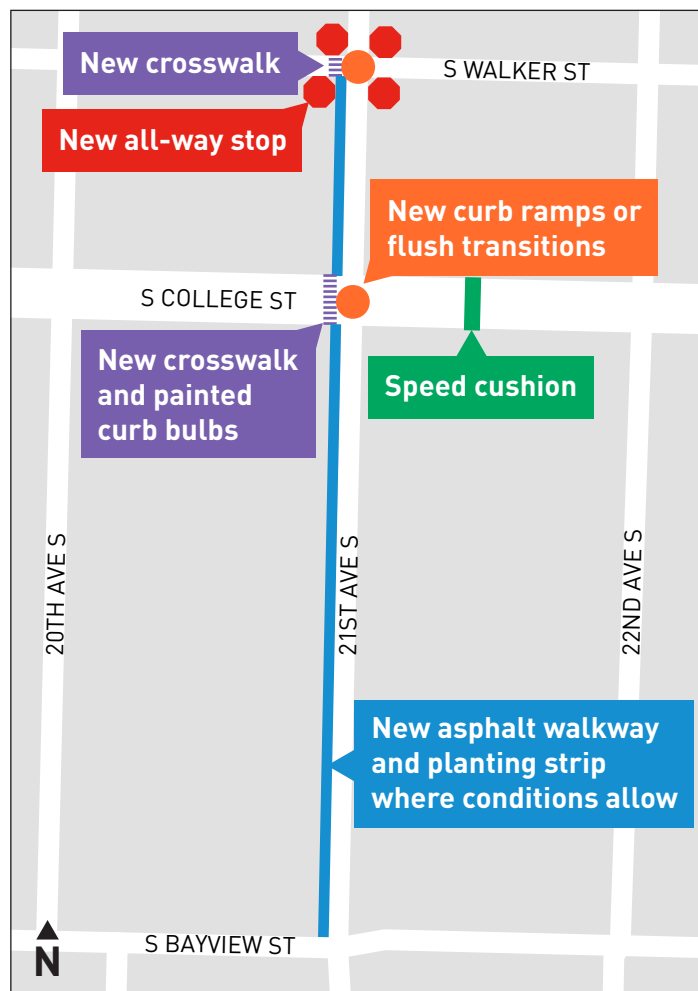

We're building a new asphalt walkway on 21st Ave S between S Walker St and S Bayview St. The new walkway will include planter strips where space allows and will make the street safer and more comfortable for people who walk and roll.

The project is currently in design and construction is expected as early as Summer 2025. Parking will be restricted during construction and crews will place "No Parking" signs at least 72 hours before construction begins so you know when construction will begin.

Driveway entrances that are on 21st Ave S between S Walker St and S Bayview St will be paved and require a short-term closure. Individual driveways will be closed during construction for several hours and construction crews will be onsite during the construction process to coordinate with residents about timing for the closure.

PROJECT DETAILS

- Build a new asphalt walkway and planting strip (where space allows) along the west side of the street.
- Install wheel stops between the planting strip and the roadway.
- Install accessible curb ramps at the intersection of 21st Ave S and S College St.
- Add painted curb bulbs at 21st Ave S and S College St to slow vehicle speeds and improve visibility for people walking and biking.
- Install a speed hump along S College St to encourage safer driving speeds.
- Coordinate short-term driveway closures on the west side of 21st Ave S to allow for repaving. Crews will coordinate on-site with residents in advance.
- Put in an all way stop with marked crosswalks on the remaining legs of the intersection of 21st Ave S and S Walker St
